One-Pager Lecture Notes

The lecture introduced you to the idea of “one-pagers” including how to create them and why they might be useful to you. In the way of a brief recap, they help you synthesize and distill important information about a topic, and you also have a “cheat sheet” you can reference later if you forget how to do something or just need a brief review of a topic you learned weeks, months, or decades ago. Essentially, you’re creating a short (it can be a little longer than 1 page, especially if your typing/printing is large) reference sheet for yourself that you can use on your quiz and in the future.

You will be creating a one-pager for each quiz. Subject to any schedule changes, quiz 1 will cover material from days 3-6, quiz 2 will cover material from days 7-9, quiz 3 will cover material from days 10-13, quiz 4 will cover material from days 14-15, and quiz 5 will cover material from days 16-24. Since there is a lot of information in modules covered on quiz 1, I will tell you what to focus on via Slack and/or a Canvas announcement.

Along with each quiz, you will be submitting your one-pager. Please don’t go over 2.5 pages typed, or 2 pages hand-written. Please scan your one-pager and convert it to an image or PDF if you hand-write it, and submit a PDF or Word document if you type it. Beyond being a completion grade that will boost your quiz grade, I will take it into account if you miss points on something that I see you understood and synthesized on your one-pager, but messed up when you were answering the related quiz question. The one-pagers will be due at the same time the quizzes are.
